

Implementing and Supporting Microsoft Internet Information Services 5.0

Duration: 3 Days **Course Code: M2295**

Overview:

This three-day instructor-led course specifically addresses the job requirements of IT support professionals who administer and monitor IIS 5.0-based Web servers, and network systems engineers who configure and secure IIS 5.0 Web sites.

Target Audience:

This course is intended for IT support professionals who need to implement and support IIS 5.0.

Objectives:

- Install IIS 5.0.
- Create and configure IIS 5.0 Web and FTP sites.
- Administer a single IIS Web site or multiple IIS Web sites.
- Implement security on an IIS server.
- Configure Web applications.
- Monitor and optimise a Web server.
- Configure IIS to provide e-mail support.
- Configure and manage Microsoft FrontPage-extended webs.
- Explain implementation differences based on the specific role of the IIS Web server.

Prerequisites:

Delegates are required to meet the following prerequisites:

- Completion of M2153, Implementing a Microsoft Windows 2000 Network Infrastructure, or have equivalent knowledge of TCP/IP, DNS, certificate services, and tasks that are performed in Microsoft Windows® 2000 Server.

Testing and Certification:

- There is currently no MCP exam associated with this course.

Content:

Installing Internet Information Services 5.0	Implementing Security on a Web Server	Managing FrontPage-Extended Webs
Configuring Web and FTP Sites	Monitoring and Optimising a Web Server	Implementing IIS 5.0
Administering Web and FTP Sites	Configuring IIS to Provide E-Mail Support	
Installing and Configuring Web Applications
